F - Pause

SPACE - Fire

A - Down

P - Right

R - Restart (quit)

The Game

Mindscape brings you true 'Days of Thunder' excitement straight from the incredible Paramount Pictures film. All the fast-paced movie action comes right into your living room on your home computer.

Take the wheel in your very own 200mph+ stock car! As you shift into high gear, you'll watch every other driver slip into your rear view mirror..or will you? Test your driving skill and and see if you have a chance to bring home Daytona. Give everything you've got and go for the Championship!

In order to take part in a race you must face a few laps on an empty track to get a qualifying grid position. As you go from track to track your ultimate aim is to be good enough to get a shot at the last race of the season at Daytona - the Championship race. Good luck!

The Pitstop

During the race your tyres, engine and fuel level will need attention. You can go into the pits on the left side of the start straight and make some repairs. First you must jack the car up either side so the tyres can be changed. To drop the car back down, click on the jack once more. To change a tyre click on the tyre in the stack. To refuel, make sure the car is level and start adding gas. Once you are all set, press on the 'G' button and you'll be off.

Make sure that you don't enter the pits too fast or you'll never stop in time!

Driving Hints

Good drivers don't hit other cars - so try and overtake your opponents without too much damage, after all it will probably be you who loses out most.

Each track requires it's own distinct driving style to win. Learn the correct gear and speed required to keep your racing line on the banked curves.

The key to success is a good qualifying position, so give it all you've got and go for pole!
